

TOP TIPS TO GET YOU STARTED!

01. CLEAR CLUTTER

Good energy flows freely in a clutter-free home! Clearing clutter is a powerful first step to creating harmony and balance — it sets the stage for transformative Feng Shui adjustments. The more you clean and clear, the greater the impact you'll feel in your space and your life!

02. FRONT DOOR

Take a moment to assess your front door. Is it well-lit and inviting? Does the lock work smoothly? Is it welcoming in appearance? Once it's in top shape, make it a point to use it regularly — it's the gateway to good energy in your home!

03. LIGHTBULBS

Take a walk through your home and replace any burnt-out lightbulbs. A burned-out bulb symbolizes a "broken" energy and can quickly spread that imbalance throughout your space. Keep your home vibrant and energized with this simple fix!

04. LEAKY FAUCETS

Take another walk through your home to check for dripping faucets, leaky pipes, or running toilets. Fixing these promptly is essential — not just for conserving water, but also for protecting the flow of positive energy, which can directly impact your finances

05. FURNITURE

Make sure the size and scale of the furniture in each room aligns with the room's dimensions and layout. Achieving proper proportion and scale is key to fostering a harmonious and balanced room.
